

Thermofluid Analysis System with Unstructured Mesh Generator

Application

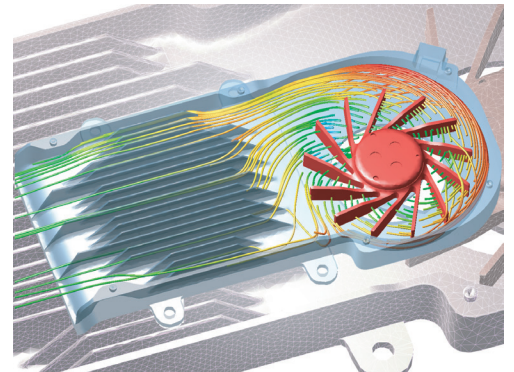

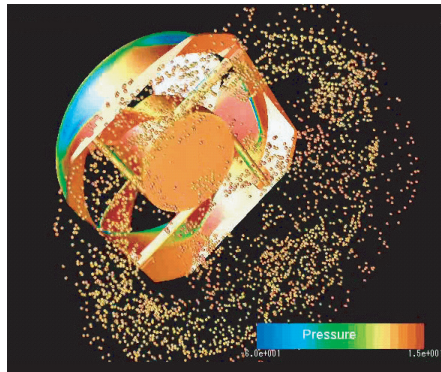

Automotive Industry

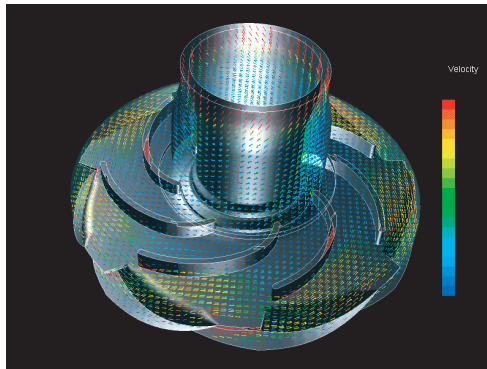

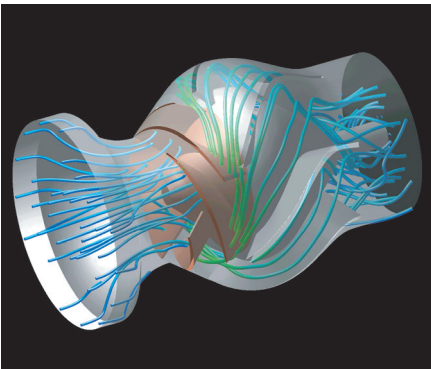

- Vehicle body aerodynamics
- Engine cylinders
- Torque converters
- Intake & exhaust efficiency
- Cabin climate control
- Thermo-flow of engine rooms

- Internal flow of refrigerator and cleaner
- Electric devices
- Liquid crystal projector
- Power unit

Electronics and Precision Equipment

Mechanical Industry

- Rotating equipment (fan/pump/turbine/mixing tank/propeller)
- Reverberatory furnace

- Wind load on buildings
- Air conditioning

Construction / Civil Engineering / Environment and Facility
